SUMMARY

Software Engineer with 2+ years building production-grade backend and full-stack systems at scale. Skilled in **Java**, **Spring Boot**, **Python**, **React**, and cloud-native microservices, with hands-on experience in distributed systems, real-time data pipelines, REST/gRPC APIs, and AI-augmented applications.

WORK EXPERIENCE

Network Engineer

May 2025 – May 2026

Arizona State University

Tempe, AZ

- Built **Python** automation tooling and **SNMP** integrations to orchestrate config rollouts, raising service uptime from 97% to 99.9%.
- Developed internal observability dashboards with **Grafana** and **CloudWatch**, reducing mean time to detect (MTTD) incidents by 45%.
- Automated firewall, VPN, and switch policy validation, cutting downtime by 30% while maintaining security compliance.

Associate Software Engineer

Aug 2023 – Aug 2024

Western Union

Pune, India

- Optimized the backend transaction engine with **Spring Boot**, **Redis**, and async queues, cutting payment latency 30% (200ms to 140ms).
- Built **gRPC** and REST microservices on **Kubernetes/Docker**, reducing deployment time 40% and improving cluster recovery 25%.
- Developed real-time microservices with **WebSockets** and **Kafka** for push notifications, boosting customer engagement by 15%.
- Co-built **T-View**, a real-time monitoring system for 1M+ daily transactions, improving fault recovery time by 40%.

Software Engineering Intern

Jan 2023 – Aug 2023

Western Union

Pune, India

- Migrated backend from **Spring Boot** 1.9 to 2.1, modernizing configurations and hardening application security posture.
- Built a serverless logging system with **AWS Lambda**, **S3**, and **CloudWatch**, cutting archival costs by 35% across 20+ services.
- Conducted load testing with **JMeter** under 500K concurrent requests, improving fault tolerance by 33%.

EDUCATION

Arizona State University, Tempe, USA

Expected May 2026

Master of Science in Computer Science (Software Engineering)

Savitribai Phule Pune University, Pune, India

Aug 2019 – May 2023

Bachelor of Engineering in Computer Engineering

PROJECTS

TrustYourself | FastAPI, Node.js/Express, Ollama, OpenAI

- Built a privacy-preserving **LLM** router (**FastAPI** + **Express**) that redacts PII via **Presidio/spaCy** and keeps sensitive queries local.
- Generated cryptographically signed (**ed25519**) receipts and a **Merkle**-based audit log to verify exactly what the cloud model received.

DeployQ | Docker, Node.js, AWS ECS, Terraform, Kafka

- Engineered an automated deployment system with **Docker**, **AWS ECS**, **IAM**, and **Terraform**, reducing manual deployment steps by 70%.
- Designed a **Kafka-ClickHouse** log pipeline for real-time debugging, cutting incident resolution time by 35%.

AgentForge | React 18, Vite, FastAPI, PostgreSQL, pgvector

- Built a responsive **React 18** + **Vite** dashboard with real-time run telemetry, **SVG** data visualizations, and JWT-guarded routing.
- Engineered the **FastAPI** backend with **PostgreSQL/pgvector** persistence, **Docker Compose**, and **GitHub Actions** CI.

TECHNICAL SKILLS

Languages : Java, Python, TypeScript, JavaScript, Go, SQL, C/C++
Backend : Spring Boot, FastAPI, Node.js/Express, gRPC, REST APIs, WebSockets, Microservices
Frontend : React 18, Vite, React Router, Axios, HTML5, CSS3, Responsive UI Design
Distributed Systems : Kafka, Spark, Redis, PostgreSQL, MongoDB, Cassandra, Elasticsearch
Cloud & DevOps : AWS (ECS, S3, Lambda, IAM), Docker, Kubernetes, Terraform, GitHub Actions, CI/CD
Testing & Monitoring: Pytest, JMeter, Unit/Integration Testing, Grafana, CloudWatch
AI & LLM Systems : LangChain, LangGraph, FAISS, pgvector, Sentence-Transformers, RAG, MCP
